Gas Fraction Grids with Observational Bands
Wet family
Dry Rocky family
H/He mass fraction
Fe fraction within non-gas material
Assessed central-M domain
Unassessed (not excluded)
Mass envelope band
Radius band
R = 2.39
Pure Fe boundary
Central mass samples
Mass envelope is conditional piecewise-linear in 3 sampled masses, not posterior. Temporary thermal boundary: T=350.0 K, P=0.1 bar, transition bar=100.0
